

CDH Medical Staff Go-Live Update: October 3, 2022

Tip of the Day: Completing Admission/Transfer Medication Reconciliation Form

Medication Reconciliation is a critical component of delivering safe care. When a Best Possible Medication History (BPMH) has been completed for a patient, this reminder will display when the Most Responsible Physician (MRP) opens the patient record.

- To complete the Admission Medication Reconciliation form, select the button “Admission Medication Reconciliation Report”.
- To complete the Admission Medication Reconciliation form at a later moment, select the most appropriate option:
 - Remind me/MRP on next chart open
 - Remind me/MRP tomorrow
 - I'll contact another person to complete
- When an admission medication reconciliation has been completed, select “Admission Med Rec has been completed”.

Key Areas to Note: Admission/Transfer Medication Reconciliation

The Admission/Transfer Medication Reconciliation supports the Most Responsible Provider (MRP) to:

- Identify and resolve discrepancies.
- Ensure there is a conscious decision to **continue**, **not continue**, or **modify** a medication regime that a patient has been taking at home.
