Gastrointestinal Tubes
 Nasogastric Nostril, left 12F

Gastrointestinal Tube Indication:
 Decompression (12 NOV 2021 13:53)

Gastrointestinal Tube Activity:
 First assessment new tube (12 NOV 2021 13:53)

GI Tube Placement Confirmation:
 Aspirations (12 NOV 2021 13:53)

GI Tube Baseline Insertion Depth at Nare
 22 cm (12 NOV 2021 13:53)

GI Tube Centimeter Marking at Nare:
 20 cm (12 NOV 2021 13:53)

GI Tube Secured With:
 Tape (12 NOV 2021 13:53)

GI Tube Patient Indicated Response:
 gagging on insertion, tolerated. (12 NOV 2021 13:53)

GI Tube Method of Drainage:
 Continuous suction (12 NOV 2021 13:53)
