

## Logging into PowerChart

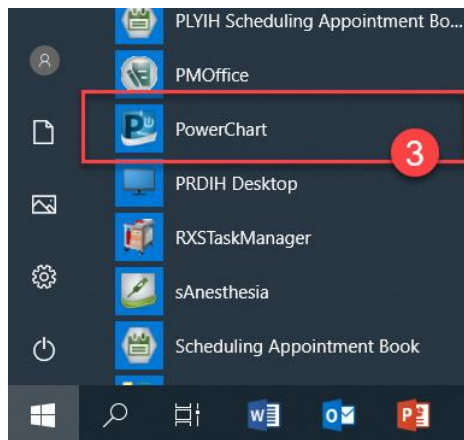

For all clinicians (nursing, HCA, NUA...) who document or access PowerChart:

From any work computer, you can access the Electronic Health Record, also called "PowerChart". Use **PowerChart** for real-time patient documentation. **Do not use PLYIH PowerChart.**

1. At the bottom left of your computer screen, click the Start Menu.
2. Click Citrix Program Neighborhood.

3. Select PowerChart in the drop-down menu.

4. You will be prompted to type your Username and Password in the pop-up window to access PowerChart if you do not already have Single Sign On.
